

Visionary Transcript Utility Standardize Transcripts

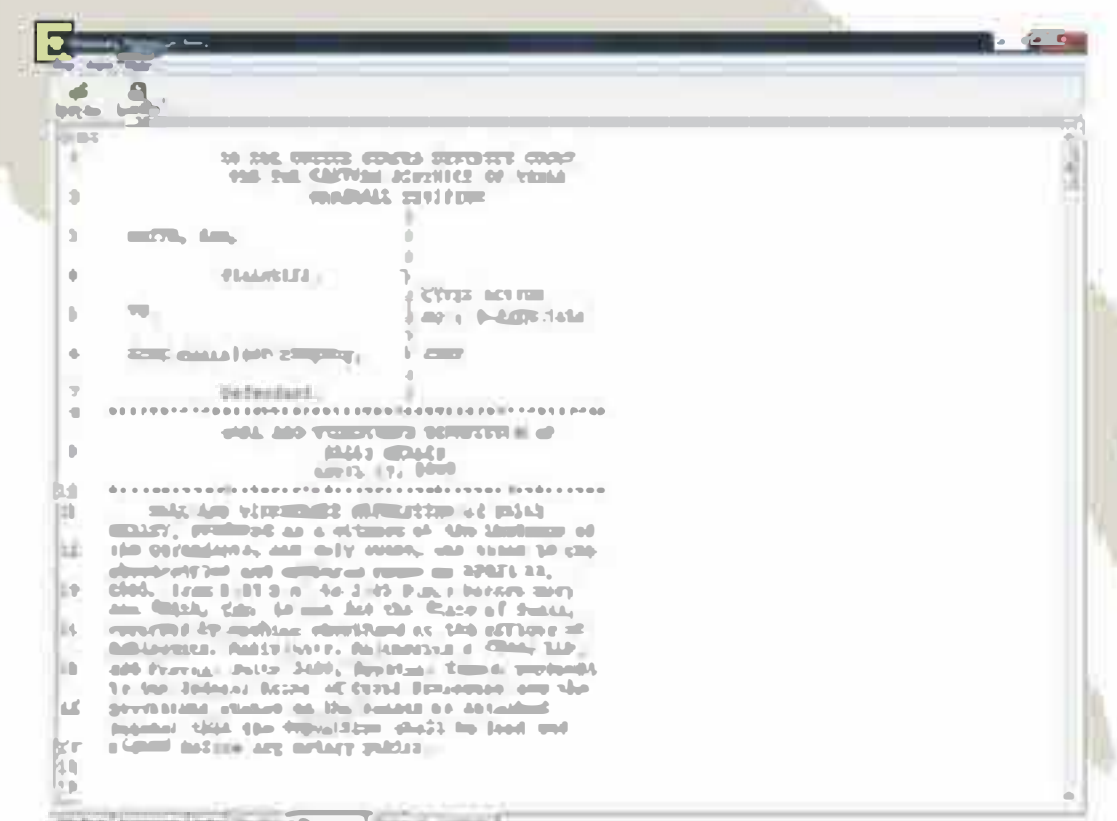

Visionary Transcript Utility is a software used to Normalize and Standardize transcripts to create Amicus-type ASCII text files for smooth importation into other Visionary Software such as the Auto-Syncer.

It adds page and line numbers to a transcript where these are presently unavailable, thereby creating a consistent format.

If you would like to see **Visionary Transcript Utility** in action, contact us at **1-800-517-2905** or sales@visionarylegal.com
